

An average infection percentage of Corona epidemic in Kerala is about 10%. But we have more than 20% of infections in Alleppey. Alleppey district is most thickly populated area. Mostly Corona Epidemic spread among children from families of fisherman folks, daily wages earners and people below poverty level. Immunity power will be low among such people due to lack of nutritional food. Their living conditions also will not be that healthy. These people may not have a better hygienic shelter, Toilet facilities, clean drinking water and proper canalizations. Those people may lack proper medication and lack necessary medicines. They will be suffering hunger due to lack of food.

Through Schritt fuer Schritt we are receiving support for the poor and providing with the necessary items to the poor. For this we are always grateful to the Sponsors for their support and love towards the poor.

Though covid epidemic is spreading vast and wide, there is no quarantine or lockdown. Even doctors say to their covid patients, “take care of your health because you have Covid symptoms”. Economically backward people will not take this word in to serious, they will move among others and people with low immunity power are getting Covid viral attack.

Covid affected people are having different kinds of other health issues too. Respiratory disorders now leads to other hazards like Kidney failure, heart function disorders, diabetic mellites, hyper tension, blood pressure variations, allergic problems even skin allergy. People are fed up of such negative factors in their life which affects their natura life. Schritt fuer Schritt / Master Vision in India try to give maximum information to the poor regarding health and dealing with their Socio and psychological balancing in life. Our former students of Schritt fuer Schritt who are working in such fields also will assist us for such activities.

We also provide food and medicines to the poor families who are not able to manage their daily life by themselves. It depends up on the necessities and financial background we provide such things for each family. We pack each packet in Jyothi Nikethan School and bring by our school bus to the villages, provide each packet at the door of the poor. Our Village people and their families are very grateful to all our Sponsors and Doners.

As we committed to the welfare of children, we have arranged seminars, orientation for parents along with children, hands-on-activities for job training, yoga classes in specific for people suffering of depression, trace job for the people, extended support to start new income generating programmes, youth empowerment seminars, women empowerment programme etc. Cultural programmes, quiz competitions, drawing competitions etc arranged and a platform for the children to showcase their talents and by that the psychological need of children and parents been cared.

During the year of 2022 we have decided to teach our students about sharing with the poor. For that we have given a family for 100 students. Always receiving is not a good habit. Therefore, we implement a program to teach the poor people to share from their nothingness to the poorer and neediest. Poor people also must have learn and feel happiness in sharing with others. First Monday of every month children must bring what they can share from the family. Each one bought a hand full of rice, some bought rice powder, wheat powder and all-purpose flours items that are grain or cereal crops flours. Spices powders like Chili Powder, Safran and other curry powders like Garam Masalas were also shared from children. Items of grains like green gram, red gram, Bengal gram, dhal, Coconuts, nuts, dry fruits were also were included in it. Different kinds of edible oils like Coconut oil, Sunflower oil and palm oil etc were also shared from children. Different kinds of Vegetable, Onion, Potato, sweet potatoes, Tapioca, different kinds of yam etc were also there. Common fruits like Banana, Mangoes, Jackfruits, Gua and Papayas were also shared from children. Soap and detergents, washing and cleaning items, Masks, sanitizer, small towels, new dress items... we have seen their joy and happiness in sharing. In our school Jyothi Nikethan, we have more than 3500 students. Therefore, they could sponsor 35 families. First Monday of every month we collect from children and the selected families must come and collect the items on next day. Long time we cannot keep such items with us, because fruits and Vegetables will damage soon. Therefore, we collect things only on Monday and distribute it on Tuesdays.

We are also happy to inform that this year school was a successful one and almost 670 children became eligible for different kinds of Scholarship for their higher studies. We thank all the Sponsors who were supporting those children for the school ways. We also have about same number of new admissions for the year 2023-2024.

Sports mainly Basketball during last three years were also a successful one in Jyothi Nikethan and among our 8 team (including boys and girls), 45 girls and 38 boys were selected as State and National team members. These results added again a golden feather on the hat of Jyothi Nikethan.
